1 Introduction

1.1 About AHDI

The Association for Healthcare Documentation Integrity (AHDI) is a not-for-profit professional association incorporated in California in February 1978, with headquarters in Modesto, California. AHDI offers information about the profession of healthcare documentation (also called medical transcription), provides continuing education for healthcare documentation specialist (also called medical transcriptionists), and enhances communication among those allied with the profession of healthcare documentation. The terms *healthcare documentation* and *medical transcription*, as well as *healthcare documentation specialists* and *medical transcriptionists*, are used interchangeably in this guide.

Find out more about AHDI by visiting our website – www.ahdionline.org.

1.2 Why Credentials?

When considering the potential implications, risks, and benefits of a credentialing requirement in any profession, it must be determined if ultimately the industry is better served by the adoption of regulations that restrict entry to practice and access to the public sector than if those regulations did not exist. In some cases, it could be argued that an industry is hindered by such regulations. Where credentialing of medical transcriptionists is concerned, however, attention must turn to what is ultimately in the best interest of patient care delivery. In what measurable ways would restricting entry to practice for medical transcription potentially protect patients, enhance the delivery of patient care services, and create operational efficiencies in healthcare delivery? This is the question that should be at the center of any discussion of credentialing of medical transcriptionists or speech-recognition editors.

While certainly there is much that has and can be said about protecting the privacy and security of patient records, it cannot be overlooked here that an unregulated, unmonitored

transcription workforce creates an access point to patient records that is incongruent with the intent of HIPAA. It might be tempting to stop at the access point and argue that transcriptionists do not need to be credentialed in order for their unique access to patient records to be tracked and monitored. However, of more critical concern than their access to patient records is the ability of medical transcriptionists to modify and alter the patient record. Safeguarding patient records does not just involve protecting the access points. It should likewise involve protecting patient record outcomes by ensuring that only skilled, qualified, and *accountable* individuals have access to patient records for the purpose of creating, modifying, and formatting the clinical care record (CCR).

Medical transcription involves a highly interpretive skill set, where medical language specialists partner with providers to create an accurate reflection of a patient care encounter. Medical transcription demands the application of informed judgment and interpretive skill that extends beyond what is *heard*. It requires a foundational understanding of the diagnostic process, clinical medicine, treatment and care to be interpreted accurately and applied within the context of complex narrative dictation. In addition to the complexities inherent in the medical document, dictating authors who speak English as a second language, those with disjointed and rambling narrative, and/or those who dictate unclearly or at accelerated speeds continue to require that medical transcriptionists bring yet another strong interpretive skill set to the process.

Medical transcriptionists cannot bring that interpretive skill set to the table without a significant foundation of knowledge and training. The pace at which healthcare delivery is moving does not allow for training or mentoring on the job. Unfortunately, an unregulated or informal training scenario creates unpredictable and dangerous gaps in knowledge and understanding that impact the interpretive process and limit the ability of the transcriptionist to identify errors and inconsistencies in the dictated narrative – a role that is critical for risk management. Flagging inconsistencies and discrepancies in the health record is the guardian role of the MT, and providers rely on the keen eyes, ears, and interpretive mind of the MT to ensure that health data is captured and recorded accurately, that inconsistencies are addressed, and that the amended record is authenticated by the provider.

Promoting a credentialing requirement for the profession will send a clear message with healthcare delivery that medical transcriptionists have met minimum standards to engage in

this risk management role. Given the vital role that health encounter documentation plays in continuity of care and accurate, timely reimbursement, healthcare delivery would be well served to understand and recognize the pivotal difference a *skilled, credentialed* MT can make to that process. A medical transcriptionist with questionable or marginal skills, at the very least, is going to be limited in his/her ability to play a contributory role in risk management and record error analysis. But beyond that, healthcare needs to consider the fiscal impact to the system of an unregulated and questionably prepared transcription workforce.

Every time a report is transcribed by an MT with a low level of knowledge and interpretive skill, the healthcare system as a whole takes the following risks that the MT will:

- Misinterpret key clinical data being dictated, resulting in the potential for this to be overlooked by the provider at the authentication point, and for the error to become part of the patient's permanent record, upon which ongoing care decisions are based.
- Miss or fail to hear critical information, resulting in omitted words or phrases that the provider may not recognize are missing at the authentication point.
- Fail to recognize dictated errors and inconsistencies and therefore neglect to flag them to the dictator's attention, again with the potential of those errors becoming part of the patient's permanent record.
- Struggle with challenging dictation or unfamiliar terminology, leaving blanks in the record that have to be routed back to and filled in by the provider or forwarded to a quality assurance (QA) department for review and correction – processes that suspend the forward progress of that record.

All of the above scenarios represent widespread impact and immeasurable cost to healthcare on a daily basis.

In a study conducted by the AHDI (then AAMT) in 2004 involving error analysis and quality review of a random sampling of acute care records across multiple US facilities, 63% of the errors found in those records were deemed to be critical and major errors, ie, those defined by the study as having a potential impact on patient safety. Of that 63%, errors specifically

attributed to the *dictator* totaled 27%.¹ This study draws into sharp relief the role an MT plays in both accurate capture and interpretation of what is being dictated *and* being able to recognize, correct, and/or flag dictator errors and inconsistencies.

The study, in which 73% of critical errors were attributable to MT practitioners, also underlines the importance of standardizing and certifying MT skills and restricting access to the practice of healthcare documentation through credentialing. Thus, while providers bear responsibility in this scenario for ensuring that they are providing the kind of high-quality dictation that facilitates accurate capture and documentation, it must be stressed that healthcare facilities and providers across the nation are incurring hidden costs and risk on a daily basis by failing to set the same kind of credentialing and best practice standards for medical transcriptionists that they do for all other members of the allied health team. Whether he/she is a physician assistant, a nurse, a radiographic technologist, or a medical transcriptionist, any worker with marginal or substandard skills and preparation is a potential risk and cost to healthcare delivery and the facility that employs him/her. While transcriptionists do not provide hands-on patient care, they are part of a critical process to create an accurate record of that care and, if unprepared, carry the potential for adversely affecting that process and/or hindering operational efficiency. At a time when healthcare delivery desperately needs processes and procedures that create *greater* operational efficiencies and reduced costs, tightening the restrictions around this sector of healthcare administration could serve to eliminate an ongoing drain on resources.

An MT already working in a contributory, risk-management-impacting role through highly skilled and informed interpretive judgment has little to fear from mandatory credentialing and everything to gain by stepping across the line of accountability set by the standard. Healthcare providers likewise have much to gain and little to lose by drawing a line in the sand that will ensure our workforce is capable of doing this accurately with a measurable impact on healthcare's fiscal bottom line.

¹ AAMT Quality Assurance Report: A Survey of Error Trends." 8 March 2007.

2 AHDI Credentials

2.1 Credentials Overview

AHDI offers two voluntary credentials for medical transcription practitioners:

- **Registered Healthcare Documentation Specialist (RHDS) – Level 1**
- **Certified Healthcare Documentation Specialist (CHDS) – Level 2**

AHDI offers voluntary credentialing exams to individuals who wish to demonstrate job readiness and level-specific competency to prospective employers, clients, and industry colleagues. In offering credentialing exams for medical transcriptionists, AHDI is protecting the public interest by promoting professional standards, improving the practice of medical transcription, and recognizing those professionals who demonstrate competency through the fulfillment of stated requirements.

2.2 Test Development & Delivery

AHDI credentialing exams are developed with [Certification Management Services \(CMS\)](#), an independent test development and psychometric analysis consulting company providing: domain analysis, job task/competency analysis, item editing and technical review, statistical validation, item selection, forms building, and standards setting.

AHDI has overall responsibility for test development and administration; however, CMS provides psychometric guidance for the testing program. AHDI's Credentialing Commission for Healthcare Documentation (CCHD), a representative group of CHDS content experts, has been trained to develop and review test questions and materials before these materials are used on exams to ensure relevancy and accuracy. The team also helps provide the job-related perspective that underlies valid exams. Each question is evaluated prior to its acceptance as a valid test item. The Credentialing Commission for Healthcare Documentation maintains responsibility for determining the exam content outline and test specifications, maintains an item bank of approved test items, approves the individual tests

for administration, and, with psychometric guidance, sets the passing score for successful achievement.

AHDI exams are delivered by [Kryterion](#), a full-service test development and delivery company that provides world-class online testing technology integrating item banking, test delivery, and real-time reports; while leveraging a global network of testing centers. Kryterion is the market leader in live Online Proctoring (OLP), which utilizes remote video monitoring to observe test takers where they live, learn, or work.

The credentialing department at AHDI determines individual eligibility for exam admission. Based on test specifications developed by AHDI, Kryterion prepares and administers the individual tests approved by AHDI. Kryterion is also responsible for procuring and maintaining testing sites and overseeing online proctoring, test security, test administration, and related functions.

3 Registered Healthcare Documentation Specialist (RHDS)

3.1 Purpose and Description

The Registered Healthcare Documentation Specialist (RHDS) exam is based on the Level 1 AHDI Medical Transcriptionist Job Description and the competencies outlined in the AHDI Core Competencies and the [AHDI Model Curriculum](#). It is a voluntary credentialing exam for individuals who wish to become Registered Healthcare Documentation Specialist. The RHDS exam is designed to assess competency in medical transcription by determining if a candidate has the core knowledge and skills needed to practice medical transcription effectively in today's healthcare environment.

AHDI recommends that candidates possess the knowledge and skills identified as Level 1 in AHDI's Medical Transcriptionist Job Descriptions and outlined in the RHDS Exam Blue Print before attempting to take the exam. The RHDS Exam Blue Print is detailed later in this chapter. Potential candidates for the exam are advised to review the outlines and assess their knowledge and skills to determine their readiness for the exam.

Individuals who successfully complete this AHDI credentialing process are recognized as Registered Healthcare Documentation Specialists and are entitled to use the RHDS designation. The credential is valid for **3 years**. RHDSs are currently required to recredential by successfully completing the RHDS Recredentialing Course offered by AHDI. Upon passing the exam, each RHDS receives a wall certificate that shows the date the credential was obtained and the date through which the credential is valid (renewal date).

The RHDS exam consists of both multiple-choice questions and fill-in-the-blank transcription against audio. Both assessment types are used to test candidate knowledge and applied interpretive judgment in all knowledge domains represented on the RHDS Exam Blue Print, including: *Transcription Standards and Style, Clinical Medicine, and Health Information Technology*.

The transcription performance portion of the exam consists of short items employing medical dictation and/or transcription that must be transcribed, proofread, and/or edited. It consists of dictation that is realistic and representative of that encountered under actual working conditions. The content areas and issues tested are listed in Sections 3.3 and 3.4 of this chapter. Dictation is selected for its appropriate medical content. The practical portion of the exam is designed to test a candidate's knowledge, skill, and ability to practice medical transcription effectively in today's healthcare environment. Emphasis in the practical portion of the exam is more on critical thinking skills rather than keyboarding, research, or other technical skills.

3.2 Eligibility and Requirements

Candidates may sit for the AHDI RHDS exam solely for the intent and purpose of seeking an AHDI credential and for no other purpose. Individuals who already possess the RHDS or CHDS credential are not eligible to take the examination.

Who should take this exam?

- Healthcare documentation specialists (HDSs), also called medical transcriptionists (MTs), who are recent graduates of medical transcription education programs
- HDSs with fewer than 2 years' experience in acute care
- HDSs working in a single-specialty environment (ie, private practice, clinic, radiology, pathology, etc)
- CHDS candidates who do not already possess an RHDS credential

MTs who are eligible to take the CHDS examination but have not earned an RHDS credential are required to demonstrate competency at the RHDS Level 1 prior to being eligible to sit for the Level 2 CHDS exam. CHDS candidates may choose to take the RHDS exam first and come back at a later time to take the CHDS exam *or* those candidates may opt to take the combined Level 1/Level 2 Credential Qualifying Exam (CQE).

NOTE: Current CHDSs are not permitted to sit for the RHDS exam.

The RHDS exam targets the Level 1 medical transcriptionist as defined in the MT Model Job Descriptions. This document describes the Level 1 MT as:

A medical language specialist who transcribes dictation by physicians and other healthcare providers in order to document patient care. The incumbent will likely need assistance to interpret dictation that is unclear or inconsistent, or make use of professional reference materials. The nature of the work performed (type of report or correspondence, medical specialty, originator) is repetitive or patterned, not requiring extensive depth and/or breadth of experience.

Candidates are advised to first assess their skills and knowledge of the content areas outlined in the RHDS Exam Blue Print of this Candidate Guide and prepare accordingly before registering to take the exam.

3.3 Content Focus

As described above, the RHDS exam is designed to assess the knowledge, skill, and interpretive ability of industry candidates seeking entry to practice. It is set up to test the key concepts, vocabularies, processes, systems, and standards outlined under the AHDI Model Curriculum and taught to students in MT classrooms. The goal is to ensure that candidates coming out of MT programs have a sound grasp of fundamental domains necessary to step into industry transcription and editing roles.

It is important to note that specialty MTs – ie, transcriptionists who work for a specialty private practice or clinic – are discouraged from taking the CHDS exam because of its acute-care focus and are eligible to sit for the RHDS exam, but the exam will require those candidates to respond to questions relating to basic acute-care concepts and document types.

The knowledge and skill of RHDS candidates will be assessed through two question types:

- **Multiple-choice.** The majority of objectives involve assessment via a multiple-choice question type whereby the candidate will be asked to select an appropriate answer from a choice of 3-4 options, depending on the nature and scope of content.

- **Transcription with Audio.** Some objectives require assessment via practical application. Candidates will be given an audio clip with transcribed text containing “blank” fields that must be filled in by the candidate. Excerpts may contain one or more blanks, and all blanks must be filled in correctly to receive credit for the question.

RHDS candidates will be given **130 questions**, distributed by predetermined weight and scope within the following three content domains below:

- **Transcription Standards and Style** – Questions in this section will assess the candidate’s understanding of the sections addressed in *The Book of Style for Medical Transcription, 3rd edition*, deemed to be level 1 concepts necessary for job readiness:
 - Medical record types, formats, and TATs
 - Rules and standards for editing
 - Health record privacy and security
 - Grammar
 - Usage
 - Punctuation
 - Capitalization
 - Plurals and possessives
 - Abbreviations
 - Numbers
 - Percents, proportions, ratios, and ranges
 - Units of Measure
- **Clinical Medicine** – Questions in this section will assess the candidate’s understanding of clinical terms, definitions, standards, and processes deemed to be level 1 concepts necessary for job readiness:
 - Medical terminology
 - Anatomy
 - Physiology
 - Disease processes
 - Diagnostics – *laboratory medicine, imaging, classification systems*
 - Treatment – *pharmacology, surgery*

- **Health Information Technology** – Questions in this section will assess the candidate’s understanding of technology terms and definitions deemed to be level 1 concepts necessary for job readiness:
 - Computers – *hardware, software, basic terminology*
 - Healthcare technology – *abbreviations, definitions*
 - Transcription technology – *abbreviations, definitions*

3.4 RHDS Exam Blue Print

All items written by the AHDI Credentialing Development item-writers are written to fulfill the following objectives outlined on the RHDS Exam Blue Print. These objectives were determined by Job Task Analysis (industry and employer survey) to be the most critical to job readiness for the MT program graduate or specialty MT seeking entry-level credentialing.

Clinical medicine questions will be limited to the following clinical specialties:

<i>Alternative Medicine</i>	<i>Neurology</i>
<i>Cardiovascular</i>	<i>OB/Gyn</i>
<i>Chiropractic</i>	<i>Orthopedics</i>
<i>Dermatology</i>	<i>Otorhinolaryngology</i>
<i>Endocrinology</i>	<i>Pediatrics</i>
<i>Gastroenterology</i>	<i>Physical/ Rehab Medicine</i>
<i>Hepatology</i>	<i>Psychiatry/Psychology</i>
<i>General Surgery</i>	<i>Pulmonary Medicine</i>
<i>Hematology/Oncology</i>	<i>Urology</i>
<i>Infectious Disease</i>	<i>Ophthalmology</i>

The RHDS Blue Print

Section 1 Transcription Standards and Style	
1.1	Given sample report content or a subheading, identify the report type (<i>autopsy, consultation, correspondence, discharge summary, history and physical examination, operative report, pathology report, or SOAP note</i>) that the information would be transcribed under.
1.2	Given sample report content, identify the correctly expressed report headings or subheadings.
1.3	Identify the role/purpose of time and date stamping in transcription.
1.4	Given dictated sentences, identify the one that would require editing on the part of the transcriptionist.
1.5	Given dictated sentences, identify the one that contains an incorrectly used term, transposed terms or values, slang term or back formation.
1.6	Given an audio excerpt containing a slang term, back formation, incorrectly used term, or transposed terms or values, fill in the blank(s) representing omitted information.
1.7	Given a scenario of encountering a contextual inconsistency or irreconcilable word or phrase, identify the proper procedure for correction and/or notification.
1.8	Given abbreviations related to health record privacy, identify the correct expanded form.
1.9	Identify appropriate examples of PHI and/or disclosure of PHI under the HIPAA privacy rule.
1.10	Identify the individuals and/or organizations that are defined as accountable parties or business associates under the HIPAA rule.
1.11	Identify appropriate security measures for protecting PHI.
1.12	Identify the recommended encryption standard of healthcare records under the HIPAA security rule.
1.13	Identify documentation authentication practices considered dangerous by both the Joint Commission and DHHS.
1.14	Given sentences with usage errors (subject/verb agreement, pronoun/antecedent agreement, who vs. whom, etc), identify the one containing correct usage.
1.15	Given sentences containing English words commonly confused for other words, identify the correct sentence.
1.16	Given an audio excerpt containing an incorrectly used English term, fill in the blank(s) representing omitted information.
1.17	Given sentences or phrases, select the one that represents correct use of punctuation.

1.18	Given words or sentences, identify the one that represents correct expression of capitalization.
1.19	Given words or sentences, identify the one that reflects correct expression of a plural; <u>or</u> given a Latin singular form, identify the correct plural form; <u>or</u> given a Latin plural form, identify the correct singular form.
1.20	Given words or sentences, identify the one that reflects correct expression of a possessive.
1.21	Given an audio excerpt containing an incorrect singular or plural form, fill in the blank(s) representing omitted information.
1.22	Given a definition, identify the correct Latin abbreviation, <u>or</u> given a Latin abbreviation, identify the correct definition.
1.23	Given sentences containing dictated abbreviations, identify the one that requires expansion under the DIAGNOSIS or OPERATIVE TITLE headings.
1.24	Identify the abbreviations found on the Joint Commission's <i>Do Not Use</i> list of dangerous abbreviations.
1.25	Given an audio excerpt containing an incorrectly used abbreviation, fill in the blank(s) representing omitted information.
1.26	Given numeric values or sentences containing numeric values, identify the one that reflects correct expression of a number or numbers.
1.27	Given a sentence where the numeric value is a blank, identify the correct numeric expression to fill in the blank, <u>or</u> given a dictated word, phrase, or sentence containing a numeric value, identify the correctly transcribed expression of a numeric value.
1.28	Given military time, identify the equivalent standard time, <u>or</u> given a standard time, identify the equivalent military time.
1.29	Given numeric expressions, identify whether a roman numeral or an arabic numeral is required.
1.30	Given an audio excerpt containing a numeric value, fill in the blank(s) representing omitted information.
1.31	Given sentences, identify the one containing the correct expression of a percent, proportion, ratio, or numeric range, <u>or</u> given a dictated excerpt containing an underlined proportion or range, identify the correctly transcribed expression.
1.32	Given an audio excerpt containing a percent, proportion, ratio, or range, fill in the blank(s) representing omitted information.
1.33	Given a metric unit, identify the property it measures; <u>or</u> given a property, identify the metric unit by which it is measured; <u>or</u> given sentences, identify the one that represents correct expression of a metric or standard unit of measure.
1.34	Given a sentence where the numeric value is blank, identify the correct expression of the numeric value and unit of measure.

1.35	Given an audio excerpt containing a unit of measure, fill in the blank(s) representing omitted information.
Section 2 Clinical Medicine	
2.1	Given the meaning of a word, identify the correct prefix, suffix, combining word, or root word, <u>or</u> given a prefix, suffix or combining form, and a definition, identify what is needed to create another given word.
2.2	Given a medical term, identify the definition, <u>or</u> given a definition, identify the correct medical term.
2.3	Given sentences, identify the correct use of a medical term commonly confused for another.
2.4	Given a directional term, an anatomical position term, or a body plane term, identify the correct definition, <u>or</u> given a definition, identify the correct directional term, the correct anatomical position term, or the correct body plane term.
2.5	Given an audio excerpt containing a clinical term, fill in the blank(s) representing omitted information.
2.6	Given a laboratory panel, identify the tests associated with that panel or identify the tests that are part of a laboratory panel.
2.7	Given a laboratory test, identify the normal values, <u>or</u> given a laboratory result, identify if the value is low, high, or normal.
2.8	Given an audio excerpt containing a laboratory term, fill in the blank(s) representing omitted information.
2.9	Given an imaging study type, identify the use or definition of that study type.
2.10	Given an imaging study, identify common abbreviations and terminology associated with that study.
2.11	Given an audio excerpt containing an imaging term, fill in the blank(s) representing omitted information.
2.12	Given a drug or drug type, identify the route or form of administration, <u>or</u> given a route or form of administration, identify the drug or drug type.
2.13	Given a drug term, identify the definition, <u>or</u> given a definition of a drug term, identify the term.
2.14	Given a drug's generic name, identify the brand name, <u>or</u> given a drug's brand name, identify the generic name.
2.15	Given a drug, identify the pharmacological category.
2.16	Given an audio excerpt containing a pharmacology term, fill in the blank(s) representing omitted information.
2.17	Given a clinical term, identify the correct definition, <u>or</u> given a definition, identify the correct clinical term. <i>See medical specialties above.</i>

2.18	Given a clinical abbreviation, identify the correct term, <u>or</u> given a term, identify the correct clinical abbreviation. <i>See medical specialties above.</i>
2.19	Given an audio excerpt containing any clinical term or abbreviation from a medical specialty, fill in the blank(s) representing omitted information. <i>See medical specialties above.</i>
2.20	Given a graphic showing anatomy or systems, identify the anatomy or system involved.
2.21	Given a position or location, identify the anatomical part of the human body.
2.22	Given a physiologic process, identify steps or functions related to that process.
2.23	Given a sign or symptom, identify the disease or syndrome.
2.24	Given a disease or syndrome, identify the treatment course.
2.25	Given a diagnostic test including laboratory studies, identify what is being measured.
2.26	Given an audio excerpt containing a diagnostic test, fill in the blank(s) representing omitted information.
2.27	Given a medication, identify the symptom or disease for which it is prescribed, <u>or</u> given a symptom or disease, identify the medication that is prescribed.
2.28	Given a classification system, identify the expressed score or grade, <u>or</u> given a classification system result, identify the disease or affected anatomical part.
2.29	Given an audio excerpt containing a classification system or treatment term, fill in the blank(s) representing omitted information.
Section 3 Health Information Technology	
3.1	Given the abbreviation of a computer term, identify the correct expanded form.
3.2	Given a computer technology term, identify the correct definition, <u>or</u> given a definition, identify the correct computer technology term.
3.3	Given the abbreviation of a healthcare documentation technology term, identify the correct expanded form.
3.4	Given a healthcare documentation technology term, identify the correct definition, <u>or</u> given a definition, identify the correct healthcare documentation technology term.
3.5	Given a term or abbreviation related to transcription technology or data exchange, identify the correct definition, <u>or</u> given a definition related to transcription technology or data exchange, identify the term or abbreviation.

3.5 RHDS Sample Questions

1. **Which refers to a “blue” condition?**
 - erythema
 - cyanosis ***
 - melanoma
 - jaundice

2. **Which represents the correct expression of a compound modifier?**
 - She was seen in counseling for her poorly-controlled diabetes.
 - The patient says he jumped from his second story balcony after his friends dared him to do it.
 - He describes his work environment as very fast paced and stressful. ***
 - This is a 36-year-old lovely looking woman who is alert and cooperative on examination.

3. **Family history is a section of what type of medical report?**
 - Discharge Summary
 - History and Physical ***
 - Operative Report
 - Pathology Report

4. **What is a combining form for mucus?**
 - mi/o
 - myc/o
 - my/o
 - myx/o ***

5. **Which of these abdominopelvic regions is located lowest in the body?**
 - epigastric
 - hypochondriac
 - hypogastric ***
 - umbilical

6. **Which plane divides the body into upper and lower portions?**
 - coronal
 - frontal
 - sagittal
 - transverse ***

7. What is the term for inflammation of the intestines?

- enteritis** *
- nephritis
- stomatitis
- peritonitis

8. Which is the plural of bronchus?

- bronchi** *
- bronchii
- bronchuses
- bronchae

9. What is another word for deglutition?

- biting
- chewing
- salivating
- swallowing** *

10. What is the tiny ball of capillaries in the cortex of a kidney called?

- glomerulus** *
- meatus
- medulla
- tubule

3.6 Transcription Against Audio

In this section, you will be asked to listen to a dictated excerpt and compare it against transcribed text in which one or more blanks are present. Your task will be to fill in these blanks with the missing information based on what is dictated in the audio file.

Keep in mind that the exam will be evaluating two critical skills in this section: (1) your ability to accurately interpret the word or phrase being dictated, and (2) your ability to express that word or phrase according to industry standards for grammar and style. Some items are specifically written to assess your ability to recognize a dictated error and edit appropriately, but do not make unnecessary edits (those that relate to preference of expression) – make only those that an MT would be required to edit for clarity.

To be successful with transcribing in this section, please keep these notifications and instructions in mind:

- *Do not* include words or phrases already provided in the text. Transcribe only the missing information.
- *Do not* add punctuation to your transcribed responses; all punctuation (commas, semicolons, and periods) has been provided for you. Inclusion of punctuation already provided will result in a mismatch against the answer key, and the item will be marked wrong.
- *Do not* include a space, tab, indent, or other visible or hidden character at the end of your response, as this will result in a mismatch against the answer key, and the item will be marked wrong.
- NOTE: *Do not* use short-cut keys; this results in immediate termination of the exam.
- *Do* include hyphens, percent signs, virgules (/), and other symbols as necessary.
- *Do* capitalize the first word of your response if it represents the first word of a sentence or is a word that would require capitalization within the sentence.

Navigate from one blank field to the next by using either your mouse or the Tab key on your keyboard.

Partial credit will not be granted for these items. If an item contains 3 blanks, all 3 blanks must be transcribed correctly to be scored as a correct response. Therefore, do not leave any of your blanks empty. Respond to all items as best you can. A blank left empty will automatically result in the item being marked wrong even if the other blanks were transcribed correctly.

The media player, located below the DIRECTIONS and above the transcribed text, will not play automatically. It appears as below when it is idle and not in use:

You will need to use your mouse to select Play [▶]. While playing, the flash player appears as below:

The 5-bar figure to the far left is the VOLUME control. You can increase volume on each file by clicking on those bars until it reaches the maximum volume you have established for your PC prior to the test. The double-bar figure to the far right is the PAUSE control. Click this at any time to pause audio play.

As the audio plays, you will note the gray progress bar moving from left to right in the center area of the player. The progress counter at the far right of the center field will tell you how many seconds into the excerpt you are at any time. **You can FAST FORWARD or REWIND the audio at any time by using your mouse to slide the gray progress bar to the left or right however far forward or backward you want to go.** Likewise, the audio file can be played repeatedly without restrictions and manipulated as often as you require. Use your mouse to navigate between the audio player functions and the transcription blank fields in the excerpt draft.

3.7 RHDS FAQs

What will the RHDS credential do for me as a new graduate?

Ultimately industry employers are looking for workforce candidates with the ability to adapt quickly to the rigors of new proprietary technologies, account specifications, and variable complexities with dictation and document types. Industry graduates, no matter how well-prepared, will struggle with these challenges in the first year of employment. For that reason, industry employers know that a significant amount of time and fiscal resources will have to be invested in an industry graduate before that new MT becomes a productive, revenue-generating member of their employment team. *Any* advantage a new graduate can demonstrate to a cautious industry employer will be critical, and credentialing is no exception. The RHDS will tell potential employers that you have met the industry's minimum benchmarks for entry to practice and are able to demonstrate competencies against an established industry blue print. It is no guarantee that an MT is well-suited for the demands and rigors of this niche market, but it can give an employer confidence in a candidate's core knowledge.

Why should a specialty or private practice MT consider taking the RHDS?

MTs who spend many years working in a single specialty (private-practice or clinic) setting will find themselves at a significant disadvantage in the job market if a change in job setting becomes desirable and/or required. Being pigeon-holed in a single specialty can make it difficult for an MT to secure employment in a different specialty or with a transcription service or hospital that will require that MT to have a multispecialty skill set. Successful completion of the RHDS can demonstrate to potential employers that a specialty MT also possesses knowledge and skill in a broader domain of clinical specialties and advanced document types.

Why doesn't the RHDS blue print contain objectives related to speech recognition editing? Even though many MT programs are beginning to integrate training in SRT editing into their course curricula, adoption of an SRT editing curriculum component is not widespread enough at this time to justify inclusion of an SRT editing objective on the RHDS exam. For this reason, SRT editing competencies are housed on the CHDS blue print and Level 2 MTs are expected to have an orientation to this skill set.

Do I have to be a member of AHDI to take the exam?

No, you do not have to be a member of AHDI to take the exam. However, a sizable discount on the exam is given to members of AHDI so we do suggest that you consider membership prior to completing the exam application. Visit the AHDI website for more information about membership.

May I use reference materials during the exam?

No. Reference materials are not allowed for either online proctoring or on-site exams at Kryterion testing centers. Electronic aids such as spellcheckers and abbreviation expanders will not be permitted. However, the exam has been designed to test core knowledge, which should not require reference materials.

Is it true that there will be no foot pedal?

Ensuring the compatibility of foot pedal hardware and software is impossible in both an online testing environment as well as with multi-site testing centers around the world. You will be required to access audio files for this exam via the use of Adobe® Flash® Player and your

mouse. Audio excerpts for this exam do not exceed 2-3 sentences in length, making use of a foot pedal unnecessary for this process. You will have the ability to manipulate the audio player with your mouse for “Play,” “Stop,” and “Pause” functions as well as the ability to move the position indicator slide bar to any point in the audio file for playback. See *Chapter 7.2 – Technical Specifications & Requirements for more information about the audio player.*

Can keyboard shortcuts be used instead of the mouse?

No. Although MTs rely on keyboard shortcuts for efficiency in their jobs, keyboard shortcuts are not integrated into the Webassessor platform, nor are candidates tested on their knowledge of keyboard shortcuts. *The use of shortcut keys results in immediate termination of the exam. Candidates must use the mouse to navigate through their exam as well as to play audio files.*

When will I receive my results?

The results will be available immediately upon completion of the exam. All candidates will receive a pass/fail report both on screen and by email at the end of the exam. Your results email will provide you with further instructions about what to expect if you passed your exam.

Will I see what items I got wrong?

You will receive only a “pass” or “fail” result and will not receive a score or breakdown of exam section results. It is prevailing practice with high-stakes credentialing exams to provide a pass/fail result *only*. AHDI does not publish its exam cut scores nor do we provide candidates with specific feedback about performance. Our exams are designed to measure skill and competency and should not be used as a diagnostic indicator of exam-readiness.

What if I pass only part of the exam?

You must pass the entire exam in order to become registered. If you do not pass the exam in its entirety, you will need to retake the entire exam.

How soon may I retake the exam?

If you do not pass the exam, there is a 6-month waiting period before you are eligible to take it again.

If I fail my exam, do I have to pay again to retake it?

Yes. The prices listed for the RHDS, CHDS, and CQE exams cover the cost of only one exam. If you fail an exam, you'll need to wait the required 6-month time period before you can reapply for eligibility. Upon receiving your Authorization-to-Test letter, you will need to follow the instructions outlined in the letter to purchase and schedule a new exam.

Can I contest my exam results?

The only ground for *contesting* an exam result is in the event of unforeseen technical or logistical difficulties that may have compromised your exam session. If you feel this has been the case for your exam session, you should file a complaint with Kryterion directly, and the technical log of your exam session will be reviewed to determine if your exam was in fact compromised. If your session was deemed to have been compromised by a significant technical or logistical problem (this does not include internet connectivity issues, which are the responsibility of the candidate), Kryterion may opt to refund your exam fees. Given your exposure to the exam, you would still not be eligible to reschedule for 6 months.

AHDI will not review **for any reason** the exam results of a first-time candidate. We will not respond to complaints or inquiries about failed exams on a first attempt. If you have failed an AHDI exam *more than once*, you may request a review of your exam file and general feedback on areas for improvement.

4 Certified Healthcare Documentation Specialist (CHDS)

4.1 Purpose and Description

The Certified Healthcare Documentation Specialist (CHDS) exam is based on the Level 2 AHDI Medical Transcriptionist Job Description and the competencies outlined in the AHDI Core Competencies. It is a voluntary credentialing exam for individuals who wish to become Certified Healthcare Documentation Specialists. The CHDS exam is designed to assess competency in medical transcription by determining if a candidate has the core knowledge and skills needed to practice medical transcription effectively in a multispecialty acute-care facility, where variable specialties, document types, and difficulty of dictation necessitate an advanced level of clinical knowledge and interpretive ability.

AHDI recommends that candidates possess the knowledge and skills identified as Level 2 in AHDI's Medical Transcriptionist Job Descriptions and outlined in the CHDS Exam Blue Print before attempting to take the exam. The CHDS Exam Blue Print is detailed later in this chapter. Potential candidates for the exam are advised to review the outlines and assess their knowledge and skills to determine their readiness for the exam.

Individuals who successfully complete this AHDI credentialing process are recognized as Certified Healthcare Documentation Specialists and are entitled to use the CHDS designation. The credential is valid for **3 years**. CHDSs are currently required to recredential by earning 30 continuing education credits (CECs) over their 3-year cycle. Upon passing the exam, each CHDS receives a wall certificate that shows the date the credential was obtained and the date through which the credential is valid (renewal date).

The CHDS exam consists of multiple-choice questions, fill-in-the-blank transcription against audio, and SRT editing against audio. These assessment types are used to test candidate knowledge and applied interpretive judgment in all knowledge domains represented on the CHDS Exam Blue Print, including: *Clinical Medicine* and *Health Information Technology*.

The transcription performance portion of the exam consists of short items employing medical dictation and/or transcription that must be transcribed, proofread, and/or edited. It consists of dictation that is realistic and representative of that encountered under actual working conditions. The content areas and issues tested are listed in Sections 4.3 and 4.4 of this chapter. Dictation is selected for its appropriate medical content. The practical portion of the exam is designed to test a candidate's knowledge, skill, and ability to practice medical transcription effectively in today's healthcare environment. Emphasis in the practical portion of the exam is more on critical thinking skills rather than keyboarding, research, or other technical skills.

4.2 Eligibility and Requirements

Candidates may sit for the AHDI CHDS exam solely for the intent and purpose of seeking an AHDI credential and for no other purpose. Individuals who already possess the CHDS credential are not eligible to take the examination.

Who should take this exam?

- Registered Healthcare Documentation Specialists (RHDSs) with a minimum of 2 years' experience in acute-care transcription or multispecialty equivalent.

Students, new graduates, and specialty MTs are strongly discouraged from taking the CHDS exam unless or until the candidate has acquired the acute-care experience or exposure necessary to demonstrate competency in the domains evaluated on this exam. MTs who are eligible to take the CHDS examination but have not earned an RHDS credential are required to demonstrate competency at the RHDS Level 1 prior to being eligible to sit for the Level 2 CHDS exam. CHDS candidates may choose to take the RHDS exam first and come back at a later time to take the CHDS exam *or* those candidates may opt to take the combined Level 1/Level 2 Credential Qualifying Exam (CQE).

The CHDS exam targets the Level 2 medical transcriptionist as defined in the MT Model Job Descriptions. This document describes the Level 2 MT as:

A medical language specialist who transcribes and interprets dictation by physicians and other healthcare providers in order to document patient care. The position is also routinely involved in research of questions and in the education of others involved with patient care documentation. The incumbent in this position is given assignments that require a seasoned depth of knowledge in a medical specialty (or specialties) or regularly given assignments that vary in report or correspondence type, originator and specialty. Incumbents at this level are able to resolve non-routine problems independently or to assist in resolving complex or highly unusual problems.

Candidates are advised to first assess their skills and knowledge of the content areas outlined in the CHDS Exam Blue Print of this Candidate Guide and prepare accordingly before registering to take the exam.

4.3 Content Focus

As described above, the CHDS exam is designed to assess the knowledge, skill, and interpretive ability of industry Level 2 MTs in an acute-care setting. It is set up to test the key concepts, vocabularies, processes, systems, and standards outlined under the AHDI Model Curriculum and taught to students in MT classrooms.

The knowledge and skill of CHDS candidates will be assessed through three question types:

- **Multiple-choice.** The majority of objectives involve assessment via a multiple-choice question type whereby the candidate will be asked to select an appropriate answer from a choice of 3-4 options, depending on the nature and scope of content.
- **Transcription with Audio.** Some objectives require assessment via practical application. Candidates will be given an audio clip with transcribed text containing “blank” fields that must be filled in by the candidate. Excerpts may contain one or more blanks, and all blanks must be filled in correctly to receive credit for the question.

- **SRT Editing Against Audio.** For this section of the exam, candidates will be provided with a speech-recognized draft of text and the accompanying dictated audio. The candidate will need to identify the word or phrase captured in error by the SRT engine and transcribe the correct word or phrase in the field provided.

CHDS candidates will be given **120 questions**, distributed by predetermined weight and scope within the following two content domains below:

- **Clinical Medicine** – Questions in this section will assess the candidate’s understanding of clinical terms, definitions, standards, and processes deemed to be level 2 concepts, ie, those common to the transcription experience of an acute-care transcriptionist or editor:
 - Medical terminology
 - Anatomy
 - Physiology
 - Disease processes
 - Diagnostics – *laboratory medicine, imaging, classification systems*
 - Treatment – *pharmacology, surgery, special procedures*
 - Equipment and instruments
- **Health Information Technology** – Questions in this section will assess the candidate’s understanding of technology terms and definitions deemed to be level 2 concepts, ie, those that reflect the MT’s understanding of trends, drivers, and standards in the health information management domain:
 - Healthcare technology – *abbreviations, definitions*
 - Electronic health record – *abbreviations, definitions*
 - Speech recognition technology – *abbreviations, definitions, & editing*
 - Standards, nomenclatures, and measurement systems – *abbreviations, definitions*

4.4 CHDS Exam Blue Print

All items written by the AHDI Credentialing Development item-writers are written to fulfill the following objectives outlined on the CHDS Exam Blue Print. These objectives were determined by Job Task Analysis (industry and employer survey) to be the most critical to an MT working in the dynamic, fast-paced environment of acute-care transcription.

Clinical medicine questions will be limited to the following clinical specialties, where the majority of content will come from the major specialties and a smaller percentage from the ancillary specialties:

Major specialties: *Cardiovascular, Dermatology, Endocrinology, Ophthalmology, Gastroenterology, Hepatology, Genetics, General Surgery, Hematology/Oncology, Infectious Disease, Neurology, OB/Gyn, Orthopedics, Otorhinolaryngology, Pain Management, Pediatrics, Plastic Surgery, Psychiatry/Psychology, Pulmonary Medicine, Rheumatology, and Urology.*

Ancillary specialties: *Allergy/Immunology, Dentistry/Oral Surgery, and Nutrition/Dietetics*

The CHDS Blue Print

Section 1	Clinical Medicine
1.1	Given a sentence, identify the correct use of a commonly confused medical term.
1.2	Given an audio excerpt containing a clinical term, correctly transcribe the excerpt, <u>or</u> given an excerpt with transcribed text, fill in the blank(s) representing omitted information.
1.3	Given a laboratory result, identify if the value is low, high, or normal.
1.4	Given an audio excerpt containing a laboratory term, correctly transcribe the excerpt, <u>or</u> given an excerpt with transcribed text, fill in the blank(s) representing omitted information.
1.5	Given an imaging study, identify processes, technologies, and patient positions used in that study.
1.6	Given an imaging study, identify common contrast media used in that study.
1.7	Given imaging study results or values, identify the associated disease or diagnosis, <u>or</u> given a disease or diagnosis, identify the associated imaging study results or values.
1.8	Given unique imaging study values, identify the correct expression or definition of the values.
1.9	Given an audio excerpt containing an imaging term, correctly transcribe the excerpt, <u>or</u> given an excerpt with transcribed text, fill in the blank(s) representing omitted information.
1.10	Given an audio excerpt containing a pharmacology term, correctly transcribe the excerpt, <u>or</u> given an excerpt with transcribed text, fill in the blank(s) representing omitted information.
1.11	Given an abbreviation, identify the correct term, <u>or</u> given a term, identify the correct abbreviation.
1.12	Given an audio excerpt containing any clinical term or abbreviation from a medical specialty, fill in the blank(s) representing omitted information.
1.13	Given a graphic showing anatomy or systems, identify the anatomy or system.
1.14	Given a position or location, identify the anatomical part of the human body.
1.15	Given a physiologic process, identify the steps or functions related to that process.
1.16	Given a sign or symptom, identify the disease or syndrome, <u>or</u> given a disease or syndrome, identify the sign or symptom.
1.17	Given a disease or syndrome, identify the treatment course.
1.18	Given a diagnostic test including laboratory studies, identify what is being measured.
1.19	Given laboratory test results or values, identify the associated disease or diagnosis, <u>or</u> given a disease or diagnosis, identify the associated laboratory test results or values.
1.20	Given an audio excerpt containing a diagnostic test, fill in the blank(s) representing omitted information.

1.21	Given a medication, identify the symptom or disease for which it is prescribed, <u>or</u> given a symptom or disease, identify the medication that is prescribed.
1.22	Given a diagnostic scenario that could include signs/symptoms, physical exam findings, diagnostic test results, and diagnosis, identify information about the signs/symptoms, physical exam findings, diagnostics test results, and diagnosis.
1.23	Given a classification system, identify the expressed score or grade.
1.24	Given a classification system result, identify the disease or affected anatomical part.
1.25	Given a surgical approach or technique (anesthesia, positions, incisions, suture techniques, etc), identify the procedure with which it is associated.
1.26	Given surgical equipment or a surgical instrument, identify the procedure with which it is associated.
1.27	Given an excerpt from an operative report, identify the procedure that was conducted.
1.28	Given an audio excerpt containing a classification system or treatment term, fill in the blank(s) representing omitted information.
Section 2 Health Information Technology	
2.1	Given an abbreviation, identify the correctly expanded form.
2.2	Given an EHR technology term, identify the correct definition, <u>or</u> given a definition, identify the correct EHR technology term.
2.3	Given an SRT term or concept, identify the correct definition, <u>or</u> given a definition, identify the correct SRT term or concept.
2.4	Given a list, identify success factors for SRT adoption/integration as defined by the Book of Style.
2.5	Given scenarios, identify the correct application of Book of Style standards for resolving style conflicts in an SRT editing environment.
2.6	Given audio and SRT draft text, identify area(s) that require editing or modification for accuracy.
2.7	Given a term or concept related to nomenclatures or measurement systems, identify the correct definition.
2.8	Given a term or concept related to NLP, identify the correct definition.

4.5 CHDS Sample Questions

1. Which of the following drugs is a cardiac medication?

- nifedipine *
- Flexeril
- lithium
- Proventil

2. Examination revealed an obese, white female in obvious respiratory distress and sweating _____.

Which is the most likely term for the blank above?

- perfusely
- purposely
- precipitously
- profusely *

3. What is exophthalmos a symptom of?

- exotropia
- hyperthyroidism *
- Addison disease
- glaucoma

4. *The cavity was thoroughly irrigated with Bacitracin solution, and a 10 mm _____ was placed in the cavity and brought out through the intact skin lateral to the incision.*

Which is the most likely term for the blank above?

- Jackson-Pratt drain *
- Foley catheter
- Hickman catheter
- Freer elevator

5. A patient who has been given a *FAB M1* classification has which disease or disorder?

- adenocarcinoma of the colon
- acute nonlymphoid leukemia *
- malignant melanoma
- hepatitis C

6. In what clinical setting is the phrase *-1 station* typically used?

- visual acuity testing
- cardiopulmonary stress testing
- labor and delivery ***
- angiography

7. *Red blood cells are normochromic and range from microcytic to normocytic. There is occasional polychromasia. A few scattered teardrop forms are identified. Platelets are normal in number with occasional large and hypogranular forms.*

The above excerpt represents which type of laboratory assessment?

- Peripheral blood smear ***
- Complete blood count (CBC)
- Bone marrow biopsy
- Flow cytometry

8. Which is given to treat hepatitis C?

- Remeron
- interferon ***
- acyclovir
- Retrovir

9. The phrase *cup-disc ratio* refers to a measurement of which anatomical structure?

- ear
- shoulder
- eye ***
- spine

10. If the patient is having surgery on his abdomen, he would be placed on the operating table in which position?

- decubitus
- lithotomy
- prone
- supine ***

4.6 Transcription Against Audio

In this section, you will be asked to listen to a dictated excerpt and compare it against transcribed text in which one or more blanks are present. Your task will be to fill in these blanks with the missing information based on what is dictated in the audio file.

Keep in mind that the exam will be evaluating two critical skills in this section: (1) your ability to accurately interpret the word or phrase being dictated, and (2) your ability to express that word or phrase according to industry standards for grammar and style. Some items are specifically written to assess your ability to recognize dictated error and edit appropriately, but do not make unnecessary edits (those that relate to preference of expression) – make only those that an MT would be required to edit for clarity.

To be successful with transcribing in this section, please keep these notifications and instructions in mind:

- *Do not* include words or phrases already provided in the text. Transcribe only the missing information.
- *Do not* add punctuation to your transcribed responses; all punctuation (commas, semicolons, and periods) have been provided for you. Inclusion of punctuation already provided will result in a mismatch against the answer key, and the item will be marked wrong.
- *Do not* include a space, tab, indent, or other visible or hidden character at the end of your response, as this will result in a mismatch against the answer key, and the item will be marked wrong.
- *Do not* use short-cut keys; this results in immediate termination of the exam.
- *Do* include hyphens, percent signs, virgules (/), and other symbols as necessary.
- *Do* capitalize the first word of your response if it represents the first word of a sentence or is a word that would require capitalization within the sentence.

Navigate from one blank field to the next by using either your mouse or the Tab key on your keyboard.

Partial credit will not be granted for these items. If an item contains 3 blanks, all 3 blanks must be transcribed correctly to be scored as a correct response. Therefore, do not leave any

of your blanks empty. Respond to all items as best you can. A blank left empty will automatically result in the item being marked wrong even if the other blanks were transcribed correctly.

The media player, located below the DIRECTIONS and above the transcribed text, will not play automatically. It appears as below when it is idle and not in use:

You will need to use your mouse to select Play [▶]. While playing, the flash player appears as below:

The 5-bar figure to the far left is the VOLUME control. You can increase volume on each file by clicking on those bars until it reaches the maximum volume you have established for your PC prior to the test. The double-bar figure to the far right is the PAUSE control. Click this at any time to pause audio play.

As the audio plays, you will note the gray progress bar moving from left to right in the center area of the player. The progress counter at the far right of the center field will tell you how many seconds into the excerpt you are at any time. **You can FAST FORWARD or REWIND the audio at any time by using your mouse to slide the gray progress bar to the left or right however far forward or backward you want to go.** Likewise, the audio file can be played repeatedly without restrictions and manipulated as often as you require. Use your mouse to navigate between the audio player functions and the transcription blank fields in the excerpt draft.

4.7 Speech Recognition Editing

In this section, you will be asked to listen to a dictated excerpt and compare it against a speech-recognized draft that contains a word or phrase captured in error by the speech

recognition engine. Your task will be to identify the word or phrase in error and provide the right word or phrase in the blank provided.

To be successful with editing in this section, please keep these notifications and instructions in mind:

- Your response should contain only the word or phrase replacing the wrong word or phrase in the transcribed text. Do not add words before or after your response that represent correct words already indicated in the text.
 - Example: In the sentence *The patient had blue stools*, the word captured in error is *blue* and should be replaced by the word *loose*. In the answer field, type only the word *loose*, not *loose stools* or *had loose stools* or any other combination. Do not retranscribe the entire excerpt.
- Do not add punctuation to your transcribed responses.
- Do not include a space, tab, indent, or other visible or hidden character at the end of your response, as this will result in a mismatch against the answer key, and the item will be marked wrong.
- The media player, located below the DIRECTIONS and above the transcribed text, will not play automatically. You will need to use your mouse to select Play [▶]. There are volume controls as well as fast-forward and rewind functions, should you choose to use those options. The excerpts are short, so your use of those buttons should be minimal.

4.8 CHDS FAQs

Do I have to be a member of AHDI to take the exam?

No, you do not have to be a member of AHDI to take the exam. However, a sizable discount on the exam is given to members of AHDI so we do suggest that you consider membership prior to completing the exam application. Visit the AHDI website for more information about membership.

May I use reference materials during the exam?

No. Reference materials are not allowed for either online proctoring or on-site exams at Kryterion testing centers. Electronic aids such as spellcheckers and abbreviation expanders will not be permitted. However, the exam has been designed to test core knowledge, which should not require reference materials.

Is it true that there will be no foot pedal?

Ensuring the compatibility of foot pedal hardware and software is impossible in both an online testing environment as well as with multi-site testing centers around the world. You will be required to access audio files for this exam via the use of Adobe® Flash® Player and your mouse. Audio excerpts for this exam do not exceed 2-3 sentences in length, making use of a foot pedal unnecessary for this process. You will have the ability to manipulate the audio player with your mouse for “Play,” “Stop,” and “Pause” functions as well as the ability to move the position indicator slide bar to any point in the audio file for playback. *See Chapter 7.2 – Technical Specifications & Requirements for more information about the audio player.*

Can keyboard shortcuts be used instead of the mouse?

No. Although MTs rely on keyboard shortcuts for efficiency in their jobs, keyboard shortcuts are not integrated into the Webassessor platform, nor are candidates tested on their knowledge of keyboard shortcuts. *The use of shortcut keys results in immediate termination of the exam.* Candidates must use the mouse to navigate through their exam as well as to play audio files.

When will I receive my results?

The results will be available immediately upon completion of the exam. All candidates will receive a pass/fail report both on screen and by email at the end of the exam. Your results email will provide you with further instructions about what to expect if you passed your exam.

Will I see what items I got wrong?

You will receive only a “pass” or “fail” result and will not receive a score or breakdown of exam section results. It is prevailing practice with high-stakes credentialing exams to provide a pass/fail result *only*. AHDI does not publish its exam cut scores nor do we provide

candidates with specific feedback about performance. Our exams are designed to measure skill and competency and should not be used as a diagnostic indicator of exam-readiness.

What if I pass only part of the exam?

You must pass the entire exam in order to become registered. If you do not pass the exam in its entirety, you will need to retake the entire exam.

How soon may I retake the exam?

If you do not pass the exam, there is a 6-month waiting period before you are eligible to take it again.

If I fail my exam, do I have to pay again to retake it?

Yes. The prices listed for the RHDS, CHDS, and CQE exams cover the cost of only one exam. If you fail an exam, you'll need to wait the required 6-month time period before you can reapply for eligibility. Upon receiving your Authorization-to-Test letter, you will need to follow the instructions outlined in the letter to purchase and schedule a new exam.

Can I contest my exam results?

The only ground for *contesting* an exam result is in the event of unforeseen technical or logistical difficulties that may have compromised your exam session. If you feel that has been the case for your exam session, you should file a complaint with Kryterion directly, and the technical log of your exam session will be reviewed to determine if your exam was in fact compromised. If your session was deemed to have been compromised by a significant technical or logistical problem (this does not include internet connectivity issues, which are the responsibility of the candidate), Kryterion may opt to refund your exam fees. Given your exposure to the exam, you would still not be eligible to reschedule for 6 months.

AHDI will not review **for any reason** the exam results of a first-time candidate. We will not respond to complaints or inquiries about failed exams on a first attempt. If you have failed an AHDI exam *more than once*, you may request a review of your exam file and general feedback on areas for improvement.

5 Credential Qualifying Exam (CQE)

5.1 Purpose and Description

AHDI offers candidates the opportunity to sit for both Level 1 (RHDS) and Level 2 (CHDS) exam content in a single exam session. For candidates who seek access to the CHDS but do not have the prerequisite RHDS credential, the CQE is an ideal fast-track option that allows a candidate to demonstrate both levels of competency at one time. The CQE is also marketed as a “threshing floor” exam to assist industry employers in determining the skill level, competency level, and interpretive experience of their current and potential employees.

5.2 Eligibility and Requirements

Candidates may sit for the AHDI CQE solely for the intent and purpose of seeking an AHDI credential and for no other purpose. Individuals who already possess a CHDS credential are not eligible to take the examination.

Who should take this exam?

- Medical transcriptionists (MTs) who have at least 2 years’ acute-care experience and feel qualified to sit for the Level 2 CHDS content but do *not* already have the prerequisite Level 1 RHDS credential.

Any MT who is unprepared for and likely unqualified to sit for the CHDS exam should not seek access to the CQE. This includes students, new graduates, and specialty MTs who lack the experience to move on to Level 2 content.

Note: A high volume of RHDS-only candidates who attempt the CQE and fail the CHDS portion can have an adverse impact on the pass/fail rates or our CHDS exam and generate unnecessary exposure of the exam to candidates clearly not qualified to access it. Only candidates who have had enough experience in the industry to suggest a readiness for both Level 1 and Level 2 content should seek eligibility for the CQE.

6 When You Are Ready to Test

6.1 Submitting Your Eligibility Fee

Congratulations! You are now ready to apply for exam eligibility. By submitting an eligibility fee and requesting an authorization to test, you are confirming that you have:

1. Read and accepted the terms and policies outlined in this guide.
2. Reviewed the applicable exam blue prints and understand the competencies against which you will be evaluated on examination.
3. Understand the restrictions for determining which exam you will be deemed eligible to take based on prerequisite requirements.

Submission of the eligibility fee will constitute a request for authorization to test, and once granted, your exam eligibility will be valid for a period of 180 days from the date of processing. You will receive your *Authorization to Test* email within 7 days of eligibility fee submission. That email will contain a unique username and password for access to Kryterion's Webassessor™ registration platform. A user profile will automatically be created for you so that you can login, select the appropriate test (based on predetermined eligibility), pay for your exam, and schedule your on-site or online proctored exam on a date and time convenient for you. If you do not register and take your exam within the 180-day eligibility window, your eligibility will expire, and you will need to reapply for eligibility. **Again, you pay your eligibility fee to AHDI, but your exam fees will be paid to Kryterion.**

To submit your eligibility fee, go to the "Certification" tab on the AHDI home page and select "Sign Up for an Exam." Follow the instructions for adding the eligibility fee to your shopping cart. Submission of the fee is considered an online store purchase and requires you to be a registered user and logged in at the time of purchase.

6.2 AHDI Membership Discount

Membership in AHDI is *not* required to take AHDI credentialing examinations. However, AHDI members do receive a significant discount on the credentialing exams as well as other valuable resources and benefits. While your eligibility fees are paid directly to AHDI, your exam registration fees are paid to Kryterion at the time you schedule your exam. The price points offered to you on the Kryterion website will be based on the membership data we export daily to Kryterion. If you are not a member of AHDI at the time you submit your eligibility fee, your profile will reflect a “nonmember” status when data is exported to Kryterion, and you will be offered only nonmember exam pricing when you register with Kryterion. Take advantage of the significant savings (reflected below) and myriad benefits of AHDI membership by purchasing membership *before* you submit your exam eligibility fee.

6.3 Exam Fees

Candidates seeking access to AHDI credentialing exams can find the pricing for these exams, based on membership status and testing option, outlined below:

RHDS Pricing (3-hour exam session)

On-site exam, member: \$150.00

On-site exam, nonmember: \$ 230.00

Online proctored (OLP) exam, member: \$100

Online proctored (OLP) exam, nonmember: \$180

CHDS Pricing (3-hour exam session)

On-site exam, member: \$200.00

On-site exam, nonmember: \$ 280.00

Online proctored (OLP) exam, member: \$150

Online proctored (OLP) exam, nonmember: \$230

CQE Pricing (5-hour exam session) *

On-site exam, member: \$275.00

On-site exam, nonmember: \$355.00

NOTE: *Online Proctoring (OLP) for the CQE exam is not available.*

NOTE: CQE candidates are given 5 hours to complete both RHDS and CHDS content due to the expectation that CHDS-eligible candidates should not require 3 hours to complete Level 1 content. Any candidate who has concerns about that time frame should consider sitting for the 3-hour RHDS first and attempting the 3-hour CHDS at a later date. The CQE is designed to fast track Level 2 candidates through the 2-part exam process.

Employers can participate in AHDI's [bulk discount program](#) as an affordable option for transitioning current workforce candidates through the exams and moving toward the goal of having a fully credentialed workforce for our industry.

7 Kryterion – Online Proctoring (OLP)

7.1 How it Works

AHDI exam candidates have the option of taking their exams remotely via Kryterion’s online proctoring (OLP) platform. Candidates launch their exams from a compatible computer via the Internet and are monitored live throughout the exam session by Kryterion proctors. This is made possible by the use of webcam video feed, whereby proctors can monitor the test taker to ensure a secure exam session.

During a webcam-monitored session, exam candidates are asked to position a webcam such that the face, hands, and keyboard of the candidate can be viewed by the proctor at all times. The session proctor will watch the candidate throughout the session to ensure the candidate is engaging in a high-integrity, secure exam interface. Candidates are required to take the exam in an isolated location without interruption from other individuals, are not allowed to speak to other individuals in the room or testing area, are not allowed to access or utilize any resources or ancillary materials, and are restricted from accessing any other software or programs on their computers while the test session is in launch mode. Proctors communicate via on-screen messaging to alert candidates to conditions or concerns the proctors may have with the test session, and sessions will be terminated if a proctor feels that a candidate is engaging in any activity, including talking (even to themselves), that could compromise the integrity of the exam session.

7.2 Technical Requirements & Specifications

Candidates interested in online proctoring will be required to ensure compatibility with the recommended specifications for the testing computer, media player, and webcam:

Computer & Internet Requirements

1. Windows or Macintosh Operating System**: Windows Vista 32-bit and 64-bit (up to and including Service Pack 2) / Windows 7 and 8 (32-bit and 64-bit); Macintosh: Mac OS X 10.5.3+ with an Intel processor type
2. Hard Drive – Minimum 500MB for Windows operating system and 5 GB for Macintosh operating system available space is recommended
3. Video – Color video display set to 1024x768 resolution
4. Internet Access – Internet access of at least 128Kbps upload speed via ISDN, DSL, T1 or cable connection (dial-up and satellite connections are not acceptable). Wireless/WiFi connections are not recommended because of the likelihood of inconsistent connectivity and camera feed issues. If you opt to use a wireless connection and your exam is suspended due to poor connectivity, you will risk forfeiture of your exam seat and fees.
5. Installed Hardware – OS compatible mouse, Approved Webcam/Microphone
6. Installed Applications – **Internet Explorer 9.0+ or Safari 4.0+, Mozilla Firefox 3.5+, Chrome 3.0+ plus the following applications installed through your Sentinel Secure™ download if not already present (Adobe Flash Player, .NET Framework 2.0+)
7. Firewall – ports 80 and 443 open
8. Administrator rights to install (the highest level user of the workstation)

***Note: Kryterion technical support team will NOT support Windows XP users or Internet Explorer 8.0 or older. AHDI and Kryterion recommend that you do not use Windows XP and that you use Internet Explorer 9.0 or higher to take an OLP exam. AHDI and Kryterion cannot be held responsible, nor will a refund be issued, if a candidate chooses to use a Windows XP computer or Internet Explorer that is not 9.0 or higher and experiences technical difficulties leading to failure of an exam or inability to complete an exam.*

Restrictions: Any scheduled or system resident software or hardware that has the capability to interrupt, intercept, or otherwise interfere with test delivery must be disabled during test sessions. This includes, but is not limited to:

- Software that has the capability to produce alerts, such as contact managers, calendars, email, etc.
- Screen and device capture utilities or Anti-virus software
- Windows Updates

Note: To avoid interruption during a Test Session, it is important that all test computer settings for Windows Update be set for manual updates. You can do this by going to the Control Panel and clicking Automatic Updates on the menu. Select the option Turn off Automatic Updates.

Web Camera Requirements

1. 640 x 480 resolution
2. Manual focus ring or Auto Focus
3. Built-in microphone preferred
4. USB connection

NOTE: The camera must be able to be positioned to provide a view of your keyboard, hands, and face.

Here's a list of compatible webcams Kryterion indicates have been successful:

- Logitech Communicate Deluxe
- Logitech QuickCam Ultra Vision
- Creative Live! Cam Optia Pro
- Creative Live! Ultra
- Clique Communications Hue HD

Webcams for Purchase

Candidates can purchase a webcam directly from Kryterion for \$45.00 via the Kryterion online store: http://www.kryteriononline.com/online_store or other retail centers.

Incompatible Webcams

Please be advised that the following webcams do not meet the technical specifications for online proctoring:

- Built-in laptop cameras or desktop cameras
- Any type of recording device such as Digital Camcorders

More detail and explanation about the technical specifications for online proctoring can be found in the [Kryterion OLP Test Taker Preparation Manual](#). If you are viewing this guide in print format, you will find the manual housed on the AHDI website on the *Sign Up for an Exam* page, which is housed under the Certification menu.

7.3 What to Expect on Exam Day

Once you have submitted your eligibility fee and receive your *Authorization to Test* email from AHDI, you will log in to the Kryterion Webassessor™ platform, where you will select, pay for, and schedule your online exam. Once your exam is scheduled, you will be asked to go through several steps for biometric (identity) enrollment and technical setup, including capture and upload of a webcam-generated photo of yourself and downloading and installing Web Sentinel™ Security Shield on your testing computer.

On the day of your exam session, you will log in to Webassessor™ and select the “Launch” button next to the exam reflected on your scheduling profile. To ensure a high-integrity exam process and limit the number of potential conflicts that could result in unexpected termination of your exam session, all candidates will be required to read and acknowledge the following rules and restrictions:

1. This is **not** an open book exam. Please place all materials and any notes or personal items you may have around you off of your workspace so that you have a clean desk.
2. Scratch paper will **not** be allowed, so please make sure you have no notebooks, papers, or scratch pads on your desk.
3. No calculating devices, communication devices (eg, pagers, cellular telephones), organizers, notes, reference book, dictionaries, or other aids are allowed.
4. Please deactivate all pagers, cellular phones, and alarm-type watches until you have completed the examination and disconnected from the test site. If you fail to do this, and your phone or pager rings, you will be notified by the proctor that you have performed a disallowed act and you may forfeit your exam.
5. You will be asked 4 demographic questions prior to the start of the exam; these are required and are not optional. Please take the time to answer them honestly. Assessing

your background and experience assists us in evaluating the performance of our exam items.

6. The examination has ** questions and a maximum of ** hours is permitted. Your exam session will be terminated at that time, even if you are not finished. If you complete the exam within the time period, you may submit your exam. Your session is complete.

*** Note: 120 questions for the CHDS, 130 questions for the RHDS, and 250 questions for the CQE; 3 hours permitted for RHDS or CHDS alone and 5 hours for CQE.*

7. Breaks* are only offered for exams taken at On-site Testing Centers. You will be permitted to take up to ** breaks of no longer than 10 minutes in length. These are requested from the proctor during the exam. These should be used solely to use the bathroom, stretch your legs, or access food/drink. Failure to return to your desk and reinitiate your exam within the allotted break time frame will result in exam termination without refund.

** Note: Breaks during Online Proctored (OLP) exams are not allowed and should only be requested from the proctor in the event of an emergency.*

*** Note: 1 break can be requested during the CHDS or RHDS alone and up to 3 breaks can be requested during the CQE. Also of note, your exam will not be paused during breaks and the time clock will continue to run.*

8. You are permitted to have a drink on your desk during an Online Proctored exam (not during On-site exams) but it must be in a clear, unmarked container with no labels or writing on it. Food must be consumed during your break times and will not be allowed on your desk at any time.
9. Scoring is based only on the total number of correct answers that are selected. Since there is no penalty for choosing an incorrect response, you should answer all exam items.
10. For the multiple-choice items on this exam, each question has only one (1) correct answer. Read each question carefully before responding.
11. Do not read anything into the question that is not asked for. Be careful to make note of what the question is asking.
12. Instructions for the audio sections will be provided at the beginning of those sections. Please follow them very carefully to avoid formatting and keyboard errors.
13. You will have the option to mark items for review. Beneath each question, you will note a box you can check to mark an item for review. Before "submitting" your exam at the end, we strongly recommend you go back through your marked items and review those completely. You can access these at any time by clicking the "Review All" button at the

bottom of each item page. Once you submit your exam, you cannot return to these items, and they will be scored in whatever state you left them in, even if they are still marked for review, so if you choose to mark an item for review without answering it, remember to go back and select an answer or you will automatically be given a zero score for each of those questions.

14. If you break connection with the exam at any time (loss of video feed, interruption in Internet connectivity, loss of electricity, etc) or if your computer locks up or freezes, please call Kryterion Test Taker support immediately to notify the proctor and seek assistance from the tech support team. In your exam registration confirmation email, you were given these access numbers and told to keep these close by but off your desk. If you did not write those numbers down, you can find them on the "Help" page if you log back into Webassessor.com.
15. If you do lose connection and have to relaunch your exam, the testing interface by default will take you to your first unanswered question. If this was an earlier item you skipped and you wish to get back to the question you were on at the time you lost connection, select "Review All" at the bottom of the item window. This will always take you to a listing of all exam questions by number and enable you to go back to the question you were on. Those marked with an asterisk represent the items you have marked for review.
16. When you have finished the exam, have reviewed all marked items, and are confident that you are finished, select "Submit" in the bottom of your item window. Keep in mind that once submitted, your exam session will terminate and you will have no further access to your items, so only select "Submit" when you are absolutely sure you are ready turn in your exam.
17. Do not use keyboard shortcuts during your exam. Although MTs rely on keyboard shortcuts for efficiency in their jobs, keyboard shortcuts are not integrated into the Webassessor platform, nor are candidates tested on their knowledge of keyboard shortcuts. *The use of shortcut keys results in immediate termination of the exam.* Candidates must use the mouse to navigate through their exam as well as to play audio files.

7.4 Special Accommodations

Candidates seeking special accommodations for AHDI credentialing examinations, either for online proctored (OLP) exams or those administered at an on-site testing facility, need to request those accommodations and seek approval a *minimum of 30 days prior to testing*. Requests for accommodations related to test aids (reference books, foot pedals, scratch paper, calculators, and online resources) will not be accepted, as these items are prohibited for all candidates per the policies outlined in this guide (*See 7.3 – What to Expect on Exam Day*), regardless of disability or special needs. For all other needs, particularly those related to visual or physical disability, medical condition/illness, etc, should be submitted via the *Request for Special Accommodations* form housed on the AHDI website under Credentialing/Sign Up for an Exam. Candidates should fill out this form electronically and email it back to credentialing@ahdionline.org. For disability or restrictions that prohibit access and/or ability to navigate this form, please contact the AHDI Professional Programs Department for assistance (800-982-2182).

7.5 Online Proctoring FAQs

Can I use my foot pedal and headset?

Headsets are permitted, but foot pedals are not. Foot pedals are not compatible with the OLP testing software and audio player. However, the audio excerpts you will be asked to listen to and/or transcribe are very short (2-3 sentences) and can be easily manipulated via the on-screen controls.

Can I take the online proctored exam via my laptop?

If your laptop and operating system are fairly new and meet the specifications outlined in the Kryterion OLP Test Taker Manual, you should be fine, but it will be important to secure direct connection to the Internet and *not* rely on a wireless or WiFi connection.

What happens if I lose electricity or Internet connection?

When there is a loss of power or a break in Internet connectivity, you will automatically be logged out of the OLP exam and your exam timer will pause until you log back in. If you lose electricity or Internet connectivity, have a computer freeze-up, or your webcam stops

working, you should attempt to log back in immediately. If you do not have the option to relaunch the exam, you should call Kryterion Technical Support right away (keep the number somewhere close by before you launch your exam) so that they can get you right back into your exam. *You must log back in and finish your exam before close of business of your exam day or you will forfeit your exam seat and fees, and your exposure to the exam will mean having to wait 6 months before you can retake the exam.*

How does Kryterion ensure my identity?

Part of your biometric enrollment process will be to submit a webcam photo as part of your user profile. On exam day, you will be asked to take another picture of yourself so that the

Kryterion proctor can match your exam-day photo with the one in your registration file. In addition, you will be asked to show your government-issued photo ID (or equivalent for countries where IDs are not issued) so that proctors can verify that the name on your ID matches the name of the candidate we have on file. When prompted to show your photo ID, hold it 10 inches from your webcam for 5 seconds.

What happens if I need to cancel or reschedule my exam? You can reschedule your OLP exam any time you want as long as it's outside of the 48-hour window (**2 business days**) just prior to your exam session. Any time prior to that 48-hour window (**2 business days**), a candidate can log in to Webassessor™ and change the date/time of an exam. Once you are within the 48-hour window (**2 business days**), you will be prohibited from changing your exam session date and time. No cancellations can be made nor exams rescheduled beyond that point. If you choose to cancel your exam, a \$30 administrative processing fee will be charged. If you fail to show up for your exam at the time originally scheduled, you will forfeit your exam seat and fees. In cases of emergent exception, Kryterion will allow a candidate to reschedule despite being within the 48-hour window (**2 business days**) or even after the fact, provided sufficient evidence can be provided to Kryterion that an extreme circumstance was encountered. Rescheduling requests should be submitted to *AHDI* at credentialing@ahdionline.org.

8 Kryterion – On-site Testing

8.1 How it Works

On-site testing is relatively straightforward and does not carry the same technical specifications and restrictions as an online proctored (OLP) exam. Candidates register via the Kryterion website and select a testing center and exam date/time. For those considering an on-site exam, you can search for the nearest testing center using the [Kryterion Testing Center Locator](#). The exam is taken in a secure on-site testing center and facilitated by on-site proctors. Exams are administered using the same OLP platform and testing interface for the same length and duration as those administered via OLP.

8.2 What to Expect on Exam Day

All of the same rules and restrictions that govern the testing session in an online proctored (OLP) environment apply to the testing center session. See 7.3 *What to Expect on Exam Day* above.

Candidates should arrive at the testing center early to sign in and be ready for proctor instructions and setup. **You must have a government-issued photo ID that reflects the same name as that on your profile.** Failure to show up at the testing center on time or without your ID will result in cancellation of your exam and forfeiture of your exam seat and fees. **Candidates are required to take the confirmation letter containing the authorization code to the testing center.**

8.3 Special Accommodations

Candidates seeking special accommodations for AHDI credentialing examinations, either for online proctored (OLP) exams or those administered at an on-site testing facility, need to request those accommodations and seek approval a *minimum of 30 days prior to testing*.

Requests for accommodations related to test aids (reference books, foot pedals, scratch paper, calculators, and online resources) will not be accepted, as these items are prohibited for all candidates per the policies outlined in this guide (See 7.3 – *What to Expect on Exam Day*), regardless of disability or special needs. For all other needs, particularly those related to visual or physical disability, medical condition/illness, etc, should be submitted via the *Request for Special Accommodations* form housed on the AHDI website under Credentialing/Sign Up for an Exam. Candidates should fill out this form electronically and email it back to credentialing@ahdionline.org. For disability or restrictions that prohibit access and/or ability to navigate this form, please contact the AHDI Professional Programs Department for assistance (800-982-2182).

8.4 On-site Testing FAQs

Will I be able to bring my own chair, keyboard, or headset to the testing center? You will be restricted to using the hardware (chair and keyboard) provided by the testing center unless there is a unique reason (ie, disability or medical condition) that would require a special accommodation. However, candidates are **required** to bring their own headset for on-site testing. If you think you qualify for special accommodations, See 8.3 *Special Accommodations* above.

Can keyboard shortcuts be used instead of the mouse?

No. Although MTs rely on keyboard shortcuts for efficiency in their jobs, keyboard shortcuts are not integrated into the Webassessor platform, nor are candidates tested on their knowledge of keyboard shortcuts. *The use of shortcut keys results in immediate termination of the exam.* Candidates must use the mouse to navigate through their exam as well as to play audio files.

Can anyone accompany me to the testing center? You are free to bring someone with you but no individuals will be allowed to sit with you in the testing room. Only registered exam candidates and proctors can enter the testing room. Visually impaired candidates who have requested an on-site reader will be allowed to have someone in the testing room with them.

What happens if I need to cancel or reschedule my exam? You can reschedule your on-site exam any time you want as long as it's outside of the 72-hour window (**3 business days**) just prior to your exam session. Any time prior to that 72-hour window (**3 business days**), a candidate can log in to Webassessor™ and change the date/time of an exam. Once you are within the 72-hour window (**3 business days**), you will be prohibited from changing your exam session date and time. No cancellations can be made nor exams rescheduled beyond that point. If you choose to cancel your exam, a \$30 administrative processing fee will be charged. If you fail to show up for your exam at the time originally scheduled, you will forfeit your exam seat and fees. In cases of emergent exception, Kryterion will allow a candidate to reschedule despite being within the 72-hour window (**3 business days**) or even after the fact, provided sufficient evidence can be provided to Kryterion that an extreme circumstance was encountered. Rescheduling requests should be submitted to *AHDI* at credentialing@ahdionline.org.

9 Exam Preparation

9.1 Strategies for Exam Success

Successful completion of AHDI credentialing exams will depend not only on training and experience but very often on focused exam preparation and study. A goal-oriented approach to competency preparation can make the difference between earning and not earning that coveted credential. Candidates should consider any or all of the following recommendations for exam prep, independent exercise, and/or collaborative group study:

1. Know and understand your exam blue print. The 130 items on the RHDS exam and the 120 items on the CHDS exam (250 total items on the CQE) come from specific core competency objectives outlined on the exam blue prints for each exam. Understanding what competency is going to be evaluated for each objective will assist a candidate in more focused and purposeful study. Blue prints for both exams along with sample assessment items and FAQs are housed in this candidate guide.

2. Invest in exam prep resources and materials.

[The Book of Style for Medical Transcription, 3rd Edition](#)

[The Book of Style Workbook](#)

[The RMT Exam Guide: A Walk Through the Blue Print](#)

[The RMT Exam Audio Objectives CD](#)

[RHDS Practice Exam](#)

[The CMT Exam Guide: A Walk Through the Blue Print](#)

[The CMT Exam Audio Objectives CD](#)

[CHDS Practice Exam](#)

[The RMT Review Guide \(Stedman's\) *](#)

[The CMT Review Guide \(Stedman's\) *](#)

For other potential self-assessment products, visit the [Self-Assessment Section](#) of the online store.

* The review guides published in partnership with Stedman’s were written prior to the release of the new RHDS and CHDS exam blue prints, so other supplemental study materials will be required with those resources, but the majority of clinical and style content in these publications is still valid and aligns with the core competency objectives housed on the new exam blue prints.

3. Sign up for online specialty courses. AHDI has partnered with Oak Horizons to offer specialty courses for exam preparation to assist candidates with facilitated study. While by no means exhaustive, these courses serve as an excellent assessment for candidates who seek practical application exercise prior to examination. For more information about how to register for these courses, select the desired course below.

[Oak Horizons Courses](#)

4. Join an RHDS or CHDS study group. One of the best ways to prepare for any exam is to partner with other candidates to study, learn, and tackle exam prep collaboratively. AHDI components and industry employers are some of the best sources for study group organization. Check the AHDI Events Calendar below for available study groups. If you don’t have a group meeting in your area, consider joining an online study group or hosting one of your own.

[AHDI Events Calendar](#)

NOTE: Visit the AHDI website to view new exam prep resources published for both exams.

9.2 Recommended Study Materials

The exam covers a broad spectrum of knowledge and skills related to medical transcription, and no single set of resources can completely encompass all the information. This list is a sampling of references corresponding to each of the major content areas in the certification exam. It does not include all resources that could be helpful in preparing for the exam, nor is it intended to be an endorsement. It is not necessary to use any of these resources in order to pass the exam, and conversely, using all of these books will not guarantee passing the exam. The Internet and local libraries and bookstores are excellent sources for these and

other references. It is preferable to use the latest available edition. No reference materials may be used during the exam itself.

Comprehensive English dictionary, for example:

The American Heritage Dictionary of the English Language, Houghton Mifflin Co.
Merriam Webster's Collegiate Dictionary, Merriam-Webster, Inc.

10 Recertification

10.1 RHDS Recredentialing

The RHDS credential is good for 3 years and expires on the last day of the month in which the credential was obtained. *Example:* A transcriptionist successfully passing the RHDS exam on September 3, 2012, will need to recredential by September 30, 2015.

In order to recredential, RHDSs must take an RHDS Recredentialing Course and pass the final exam prior to the expiration date of their credential. RHDSs can take the RHDS Recredentialing Course any month after receiving their 6-month reminder but must complete the course before their deadline. In the event the RHDS does not pass, they have the option to retest one additional time. Recredentialing is valid for 3 years. At any time, an RHDS may opt to sit for the CHDS exam. If they pass, they relinquish their RHDS credential in favor of the CHDS credential, and begin a new recertification cycle for their CHDS. If they do not pass, they continue in their cycle as an RHDS and must meet the recredentialing requirements in order to maintain their RHDS status.

RHDSs are not required to accrue or report continuing education credits in order to maintain their credential. Membership in AHDI is not a requirement for the RHDS credential; however, it is encouraged because of the opportunities and benefits afforded members.

Current RHDSs who want information about the recredentialing course or how to file an extension or need access to forms and procedures related to recredentialing or end-of-cycle submissions and process will find all of those resources housed in the RHDS-Only Area of the AHDI website. *You must be logged in to access that page.*

Note: RMTs may bridge to the RHDS at any time during their current cycle by taking and successfully passing the RHDS Recredentialing Course, at which time a new cycle will begin. Further information can be found on the [Rebranding the AHDI Credentialing Exams](#) web page.

10.2 CHDS Recredentialing

The CHDS credential is good for 3 years and expires on the last day of the month in which the credential was obtained. *Example:* A transcriptionist successfully passing the CHDS exam on September 3, 2013, will need to recredential by September 30, 2017.

CHDSs maintain this credential through participation in continuing education activities relevant to medical transcription. Recertification is required every 3 years. CHDSs maintain and build on their competency in the field of medical transcription with continuing education (CE) activities. This is necessary for the practitioner to function effectively in today's fast-paced healthcare environment. A minimum of **30 continuing education credits (CECs)** must be accrued during that 3-year cycle, with at least 24 of these in the core areas of *Clinical Medicine, Medical Transcription Tools, Technology and the Workplace, and Medicolegal Issues*. The remaining 6 required CECs may be obtained in either the Core areas mentioned above or the Optional areas of *Complementary Medicine* or *Professional Development*.

Membership in AHDI is not a requirement for the CHDS credential; however, it is encouraged because of the opportunities and benefits afforded members.

Current CHDSs who want information about the requirements for continuing education or how to file an extension or need access to forms and procedures related to recredentialing or end-of-cycle submissions and process will find all of those resources housed in the CHDS-Only Area of this website. *You must be logged in to access that page.*
