The CMT Review Guide

The CMT Review Guide is an excellent resource manual to prepare for the CMT credentialing exam. Every core content area of the CMT exam is topically addressed in this text. In addition to transcription standards and style, English language, medicolegal and privacy issues, and the healthcare record, *The CMT Review Guide* takes an organized approach to medical language by providing learning objectives and over 50 review questions (20 in print, 30 on CD-ROM) for each major body system covered on the exam. With this systematic approach, the test candidate will gain the confidence and competency needed for successful exam preparation and performance. Purchase directly through Stedman's (www.stedmans.com) or through the AHDI online store (www.ahdionline.org).

The RMT Review Guide

The RMT credential is a Level 1 designation and is designed for practitioners based in physician offices, those working only with certain specialties, and also for the graduating medical transcription student. Highlights include:

- 3 major units of study (Medical Language, Systems/Specialties, & English Language)
- Sample reports in each chapter
- Review questions to access your preparation level
- **Bonus CD** including 360 additional review questions!

Purchase directly through Stedman's (www.stedmans.com) or through the AHDI online store (www.ahdionline.org).

Mega MT Challenge I & II

These electronic CDs contains over 1200 questions (combined) related to the practice of medical transcription. You'll find questions pertaining to medical terminology, English fundamentals, pharmacology, and an array of medical specialties. A broad variety of question formats (including multiple-choice, true/false, circle one, fill in the blank, etc.) are designed to fully test the wealth of knowledge essential to the practice of transcription. Whether used for self-study, exam preparation, evaluation, staff training, potential employee testing, or classroom instruction, these products are designed to help meet those needs. Order online or by phone.

CMT Prep Quizzes, Volume 1

CD contains a whopping 240 exam-style questions, answers, and descriptions as found in archived publications. This interactive CD allows you to take the quiz on screen, view the answers and descriptions, and (for CMTs seeking CE credit for recredentialing) print a score sheet at the end of each quiz. In addition to some great level II prep questions, this product will also give CMT candidates practice with on-screen test taking. Approved for 12 Clinical Medicine CECs. Order online or by phone.

Multiple-Choice Self-Assessment Workbook

Multiple-Choice Self-Assessment can help MTs evaluate their knowledge in six major content areas. Previously used in preparing MTs for Part I of the CMT exam, this module consists of 60-multiple choice questions, arranged randomly in one section and by content area in a second section. Answer keys and content codes provided. Three-hole punched booklet (8 1/2 x 11) for easy storing. Order online or by phone.

CMT Prep Assessment Online Course

Offered every month of the year, this four week course is designed to assist individuals preparing for the CMT exam. Course offers assessment in over 20 body systems. Each body system covered will list websites, medical texts, and references from *The Book of Style for Medical Transcription 3e.*, where applicable. Register online or by phone.

Online Continuing Education Courses

AHDI has partnered with OAK Horizons, Inc., to offer a number of specialty modules for continuing education credit. Offered every month of the year, these four-week courses present an opportunity to increase your knowledge and skills, improve quality and productivity, and learn timesaving research techniques for your work setting. Each module covers anatomy, physiology, pharmacology, laboratory, terminology skill-building, procedures, special tests, and diseases as they pertain to the particular specialty. Participants transcribe physician dictation including chart notes, history and physical exams, discharge summaries, initial office evaluations, consultations, and letters using transcription guidelines as they pertain to the specialty/body system. There is continual testing and evaluation throughout the program. Assignments are self-corrected. Each participant who completes the course will receive an email providing proof of completion.
